

# IO BEATS DAO — TEAM VESTING & ANTI-RUG FRAMEWORK

Premium Orange DAO Edition – Institutional CEX Package (v1.0)

Official Document · 2025

## 1. Overview

IO Beats DAO operates a top-tier, multi-chain vesting and anti-rug architecture across Ethereum, BNB Chain, Base, Polygon, and Arbitrum. All allocations use Sablier V2 Immutable Streams secured by Safe Multisig Governance, ensuring institutional-grade transparency, operational safety, and long-term contributor alignment.

## 2. Multisig Governance Architecture

- Safe Multisig (4/7 signers)
- Founder has no unilateral control
- All treasury actions require 4 approvals
- Immutable vesting except DAO-authorized cancellations

This ensures maximum security for centralized exchanges, auditors, and investors.

## 3. Team Vesting Summary (Global Table)

Role	Duration	Cliff	Linear	Cancelable	Transferable	Allocation
Founder	5 years	12m	48m	NO	NO	2.5B IOB
Co-Founder	42m	6m	36m	NO	NO	250M/chain
Tech Lead	42m	6m	36m	YES	YES	200M total
Governance Leader	48m	6m	42m	YES	YES	Equal streams
